TAMIO CHURCH

User guide

Your church’s treasury and secretary work on iPhone, iPad and Mac: how to sign in, what each screen shows and how to do each task, step by step.

Version 1.0.7 October 2026 tamio.church

Contents

1	Before you start	Account, roles, first sign-in, Face ID, offline	3

17	Tamio on the Mac	Inspector, quick capture and shortcuts	32
18	FAQ and help	Common questions and where to get help	35

CHAPTER 1

Before you start

Tamio keeps the church's books: the money coming in and going out, bank deposits, the membership roster, minutes, letters and the calendar. The whole team works on the same information, each person from their own device and with their own account.

Which devices it runs on

- **iPhone and iPad:** the **Tamio Church** app from the App Store.
- **Mac:** the same app from the Mac App Store, or the download at **tamio.church** (the "Download for Mac" button). It requires macOS 26 or later.

What you record on one device shows up on the others: Tamio syncs on its own when you open the app, when you save and when the connection comes back.

Who does what: the three roles

Each person signs in with their own email and has one of these roles. What a role can't do isn't greyed out: it simply doesn't appear.

Role	What they see and can do
Administrator usually the pastor	Everything: Treasury and Secretary. They also invite other people, change permissions and, if the church has the bank feature, connect the bank.
Treasurer	Home, all of Treasury (income, expenses, contributors, deposits, reports, to review), the Treasury Log and Settings. Membership only if the administrator opens it to them.
Secretary	All of Secretary (membership, services, minutes, letters, calendar and reports), the financial Reports as read-only, the Secretary Log and Settings. They don't see Treasury or Home.

How to get an account

The app has no "Create account" button. There are two ways in:

1. **Tamio is licensed per church, and accounts are created at tamio.church.** Whoever creates the account gets an invitation email. Opening it, they choose a password, and their account becomes the **Administrator** of a new church.
2. **The administrator invites the rest of the team** from **Settings › Access & areas** (see chapter 16). Each person gets an email to set their password.

The password

It must be at least 8 characters long, with a lowercase letter, an uppercase letter, a number and a symbol (such as ! # $ or %). If you use iCloud Keychain or 1Password, save it under the site **tamio.church** so your iPhone offers it when you sign in to the app.

The first time you open the app

1. On iPhone and iPad you'll see four welcome screens. On the first one you can choose the language: **Español**, **English** or **Automatic**. Tap **Next** or **Skip**, and at the end **Get started**.
2. Enter your **Email** and **Password** and tap **Sign in**.
3. If your account has **two-step verification**, enter the 6-digit code shown by your authenticator app.
4. If you're the first person from your church, Tamio asks for the church name, the city and the currency. You can change all of it later in Settings.
5. If the roster is empty, Tamio offers **"Bring your people"**: import people from Excel or a Google Sheet saved as CSV. You can tap **I'll do it later** and do it afterwards from **Settings › Data**.

Forgot your password?

1. On the sign-in screen, tap **Forgot your password?**.
2. Enter your email and tap **Send code**. A code arrives by email; check your spam folder too.
3. Enter the code, type your new password twice and tap **Change password**.

Protect the app with Face ID

In **Settings**, tap your name at the top and turn on **Require Face ID to open** (or Touch ID, depending on the device). From then on Tamio locks every time you leave the app, and hides the figures in the app switcher. If Face ID doesn't recognize you, you can open it with the device passcode: nobody gets locked out of their own books.

It works without internet, too

You need a connection to sign in the first time. After that, you can record offerings, expenses, attendance or minutes even when there's no signal in the sanctuary: everything is saved on the device and uploads on its own when the connection returns. Even the photo of the bank receipt is kept on the phone and uploaded later.

Before you sign out

Signing out erases the church's copy from the device. Whatever was already uploaded comes back when you sign in again; whatever wasn't uploaded yet is lost. Tamio tells you how many changes are still waiting to upload before it lets you sign out.

CHAPTER 2

Getting around

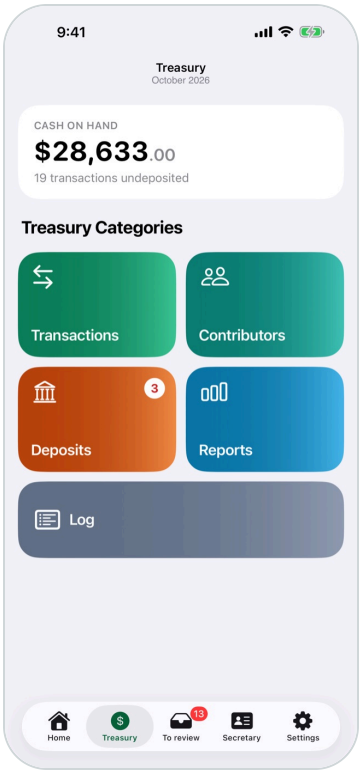

On iPhone: tabs at the bottom

At the bottom there are up to five tabs, depending on your role:

- **Home**: the month at a glance.
- **Treasury**: cash on hand and shortcuts to **Transactions**, **Contributors**, **Deposits**, **Reports**, **Log** and, if enabled, **Bank**.
- **To review**: what's waiting for your approval. The red number tells you how many items there are.
- **Secretary**: the active roster, upcoming commitments and shortcuts to **Membership**, **Membership reports**, **Calendar**, **Service log**, **Minutes**, **Letters & transfers** and **Log**.
- **Settings**: always there.

People with the Secretary role get a **Reports** tab instead of Treasury.

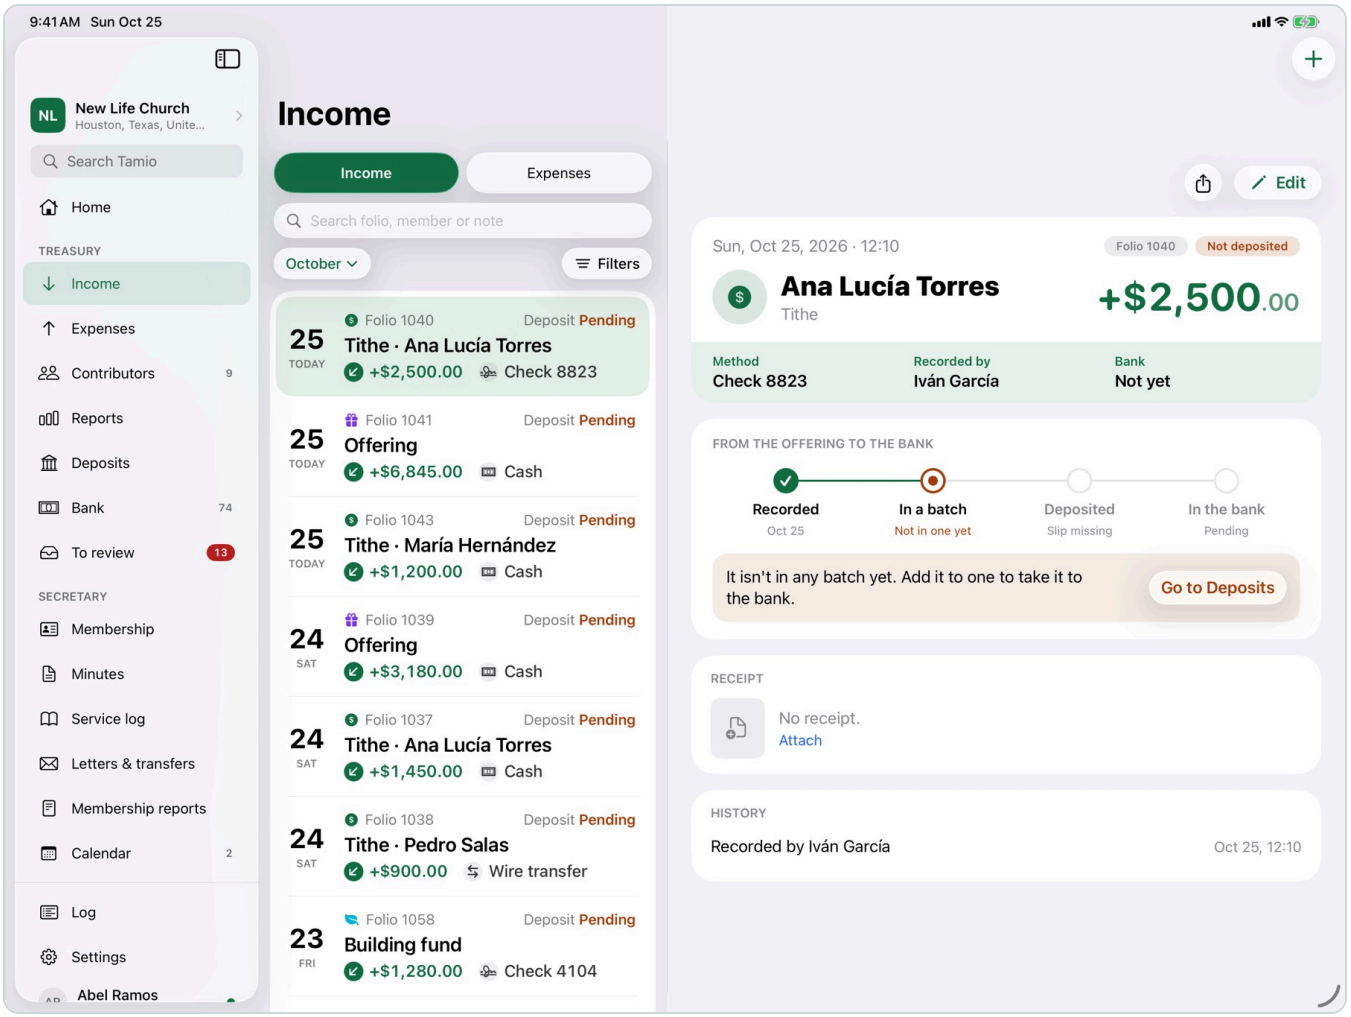

In almost every list, the **+** button at the top right creates something new, and the lines button opens the filters.

Treasury on iPhone

On iPad: sidebar

On the left is the sidebar with two groups, **TREASURY** (Income, Expenses, Contributors, Reports, Deposits, Bank, To review) and **SECRETARY** (Membership, Minutes, Service log, Letters & transfers, Membership reports, Calendar). At the bottom are **Log**, **Settings** and your account, with a green dot when everything is synced. The list and the detail show side by side: tap a row and its detail opens next to it. In portrait, the sidebar hides itself once you pick a section.

Income on iPad, with a transaction's detail alongside

On Mac: sidebar, table and inspector

The Mac has the same sidebar. Each section is shown as a table, and on the right the **inspector** shows the detail of the row you select (open and close it with ⌘ I). The main sections have shortcuts: ⌘1 Home, ⌘2 Income, ⌘3 Expenses… The full list is in chapter 17.

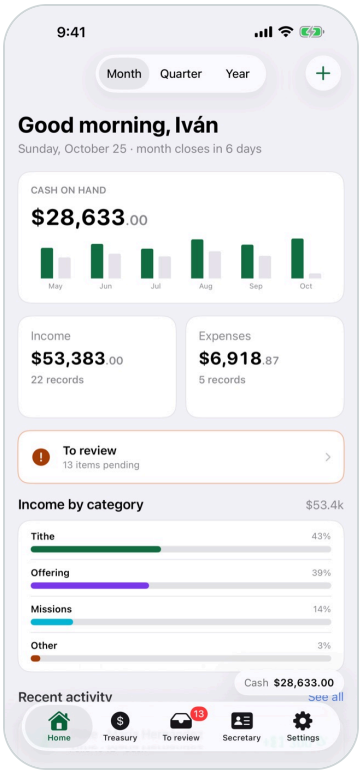

CHAPTER 3

Home

The first screen for the administrator and the treasurer. It shows at a glance how the month is going.

- **Greeting and month-end:** “Good morning…” and how many days are left until the month closes.
- **Period:** at the top choose **Month**, **Quarter** or **Year**, and every figure changes.
- **Cash on hand**, with bars for the last few months.
- **Income** and **Expenses** for the period, with how many entries each has.
- **To review:** how many items are awaiting approval. Tap it to go to the inbox.
- **Income by category:** how much is tithe, offering, missions…
- **Recent activity** (with **See all**) and **This week**, what’s next on the calendar.

The **+** button at the top opens a new income entry directly.

Home on iPhone

CHAPTER 4

Income and expenses

The church's ledger. Every tithe, offering or payment is kept with its number, date, payment method and who recorded it.

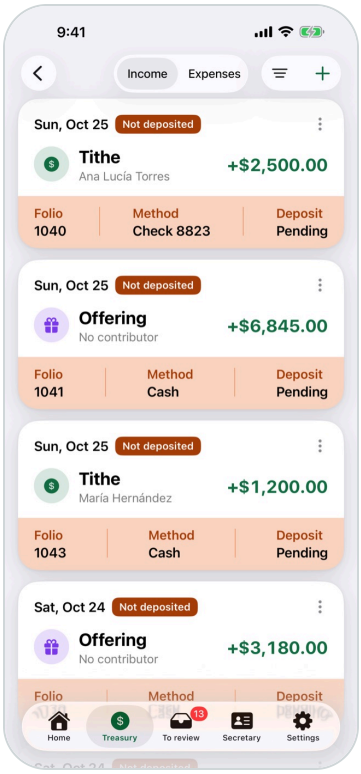

Where it is: iPhone, **Treasury › Transactions** (choose **Income** or **Expenses** at the top). iPad, **Income** or **Expenses** in the sidebar. Mac, `⌘2` or `⌘3`.

The list

Each card shows the date, the category, who gave or who was paid, the amount, the number, the method and whether it has been deposited. The colored tags tell you:

- **Not deposited:** the money is still in the cash box; it isn't in any batch yet.
- **Flagged for review:** waiting for approval in To review.
- **Not uploaded:** saved on the device; it will upload when there's a connection.

With the filters button you choose the **period**, the **category** and the **status**, and search finds entries by number, name or note.

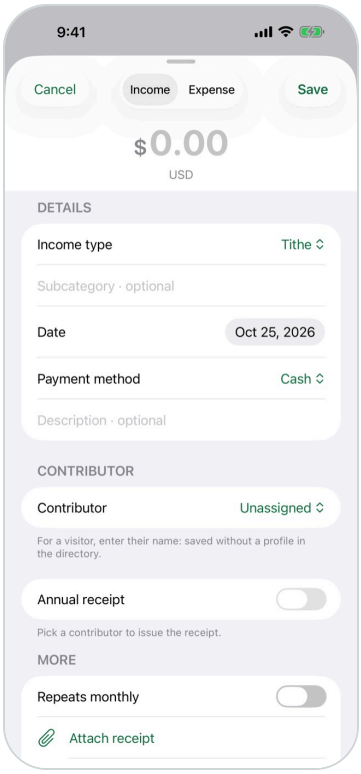

The income list

Record income or an expense

1. Tap **+** (**New**). At the top choose **Income** or **Expense**.
2. Enter the **amount**.
3. Under **DETAILS** choose the **Income type** (Tithe, Offering, Missions, Events, Donation, Other) or the expense **Category**, the **Date** and the **Payment method** (Cash, Transfer, Check, Card, Direct debit).
4. For income, choose the **Contributor**. If it's a visitor, type their name: it's saved without a roster profile. Turn on **Annual receipt** if that person will ask for their year-end statement.
5. For an expense, enter who was paid under **Paid to**.
6. Tap **Save**, or **Save and add another** if you're entering several in a row.

Tamio assigns the **number** on its own. The required fields are the amount, the category and, for an expense, who was paid; if something is missing, Tamio tells you what.

A new income entry

Optional, under MORE

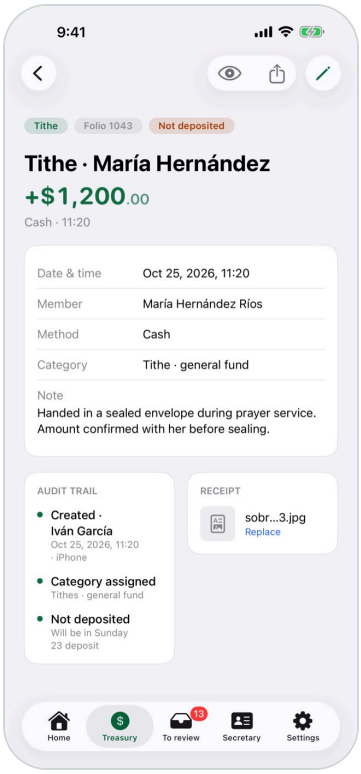

- **Attach receipt**: a photo or a file of the receipt or invoice.
- **Repeats monthly**: for rent, utilities or a fixed support payment (see "Recurring" below).
- **Include in Sunday deposit**, the **time**, **notes** and, for an expense, **Flag for review**.

A transaction's detail

Tap any transaction to see its full detail:

- Date and time, contributor or payee, method, category and notes.
- **RECEIPT:** view it, replace it or attach one if it's missing.
- **FROM THE OFFERING TO THE BANK:** the money's path in four steps (Recorded → In a batch → Deposited → At the bank). If it isn't in any batch yet, it takes you to Deposits.
- **HISTORY:** who recorded it, which batch it's in and when it was deposited.

At the top are **Share** and **Edit**.

A tithe's detail

Correct or delete

Swipe a card to the left to see **Edit** and **Delete**, or use the card's ··· button, which also has **Attach receipt** and **Flag for review**. Deleting asks for confirmation and can't be undone, but it's noted in the **Log** with the amount and the number. The administrator can take away the treasurer's permission to delete (chapter 16).

Recurring

When you save a transaction with **Repeats monthly**, Tamio records it on its own every month. Recurring items appear in the list under **RECURRING FIXED INCOME** or **RECURRING FIXED EXPENSES**, and they don't count in the total until the month closes. Swipe them to **Edit** the amount or the day, or to **Stop repeating**; what was already recorded is kept.

Bring in past months from Excel

If you kept the books in Excel or another program, go to **Settings › Data** (on the Mac, the **File** menu) and choose **Import transactions**. Date and amount are enough: in one column, with expenses negative, or in **Money in** and **Money out**. Before saving, Tamio shows you what comes in and what goes out; categories it doesn't know you create or match to one of yours. Income comes in as already deposited, To review doesn't ask for its receipt and, if something goes wrong, **Undo** removes the whole import.

CHAPTER 5

Contributors

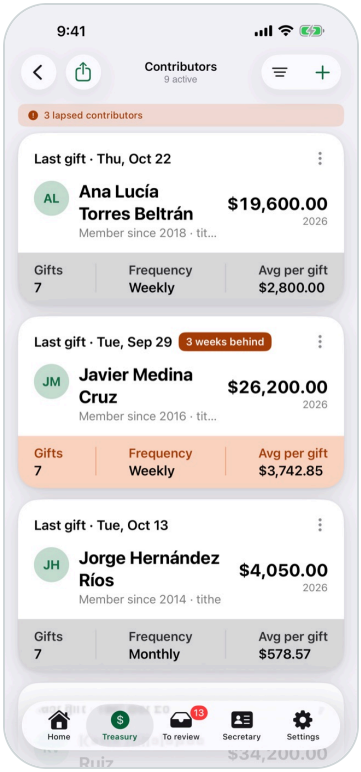

The people who tithe or give, with what they've given this year and their annual statement.

Where it is: iPhone, **Treasury › Contributors**. iPad, **Contributors**. Mac, `⌘4`.

The list

Each card shows how much the person has given this year, how many times, how often and their average. At the top, a banner flags who has **lapsed** lately, and that person's card says how many weeks behind they are.

The filter chooses between **Active**, **Removed** and **All**. The **+** button adds a new contributor: name, phone, email, tax ID, member since and how often they give.

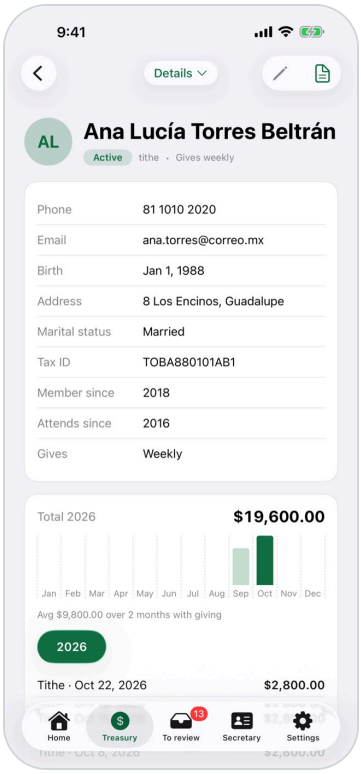

Contributors

The profile and the annual statement

Tap a person to see their giving month by month and their most recent gifts. From the **Documents** menu you can produce:

- **Annual statement:** pick the year and Tamio builds the PDF with every gift and the total, ready to **Share** or print.
- **Giving report:** the same for a week, a month, a year or a date range.

> **For a complete statement**
> First fill in the church's name, tax ID and address in **Settings › Church** and **Institution**. If something is missing, Tamio tells you.

A contributor's profile

Bring your people in from Excel

If you already have your people or their giving in Excel, a Google Sheet or another system:

1. Save the file as **CSV** (in Excel: File › Save As › CSV).
2. Go to **Settings › Data** (or the **File** menu in Contributors) and choose **Import people**. If you like, first tap **Download the template**.
3. **Step 1 of 2:** tell Tamio which column is which. Anything you don't want to bring in, leave as "— Don't import —".
4. **Step 2 of 2:** Tamio shows how many people are new, how many will be updated and which rows have problems. Nothing is saved until you tap **Import**.
5. Afterwards, if you like, import the **gifts**. They always come after the people: each gift is assigned to someone already in Tamio.

If you import the same file twice, nobody is duplicated.

CHAPTER 6

Deposits

A **batch** gathers the cash-box money that goes to the bank on a single slip: for example, everything from Sunday's service. A batch's total is always the sum of its transactions; it's never typed in.

Where it is: iPhone, **Treasury › Deposits**. iPad, **Deposits**. On the Mac you can view batches (⌘6), but you build and deposit them from iPhone or iPad.

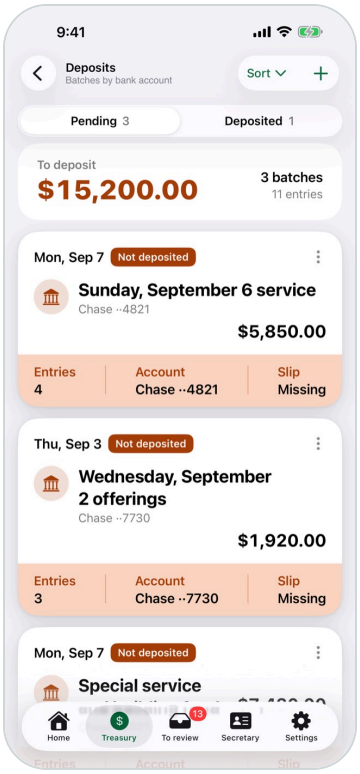

The list

At the top choose **Pending** or **Deposited**. The **To deposit** box shows how much money sits in batches that haven't reached the bank yet. A batch stays pending until you record the bank slip.

Build a batch

1. Tap **+** (**New**).
2. Enter the **Batch title** (for example, "Sunday, September 6 service") and choose the bank **Account**. Tap **Create**.
3. Under **Undeposited money**, check what goes in this batch and tap **Add**.

If there's no undeposited money left, record the income in Transactions first.

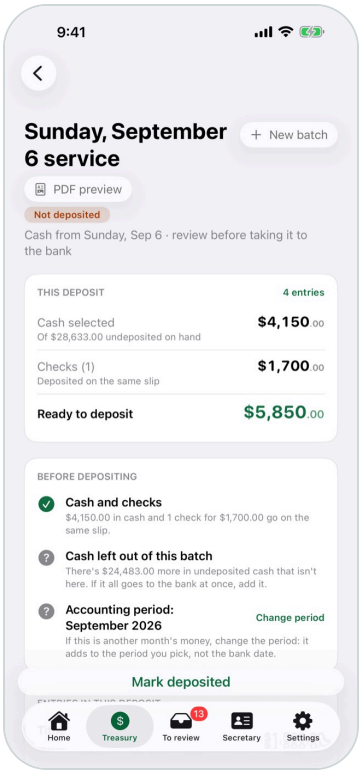

Deposits: what still needs to go to the bank

Inside a batch

It shows the cash and checks going on the same slip, and the **Ready to deposit** total. The **BEFORE DEPOSITING** section flags what's worth checking:

- whether the batch has no account assigned;
- whether there's more cash in the box that isn't in this batch, with **Add** to put it in right away;
- the **accounting period**: if the money belongs to last month, change it so it counts in that month and not on the day you take it to the bank.

With **PDF preview** you print the batch to hand in with the money.

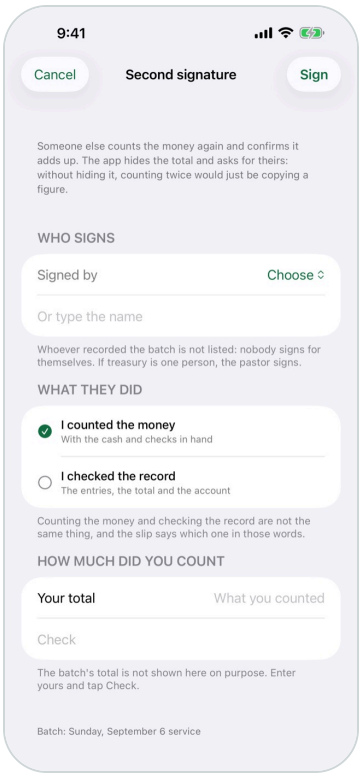

Inside a batch

The second signature: someone else counts again

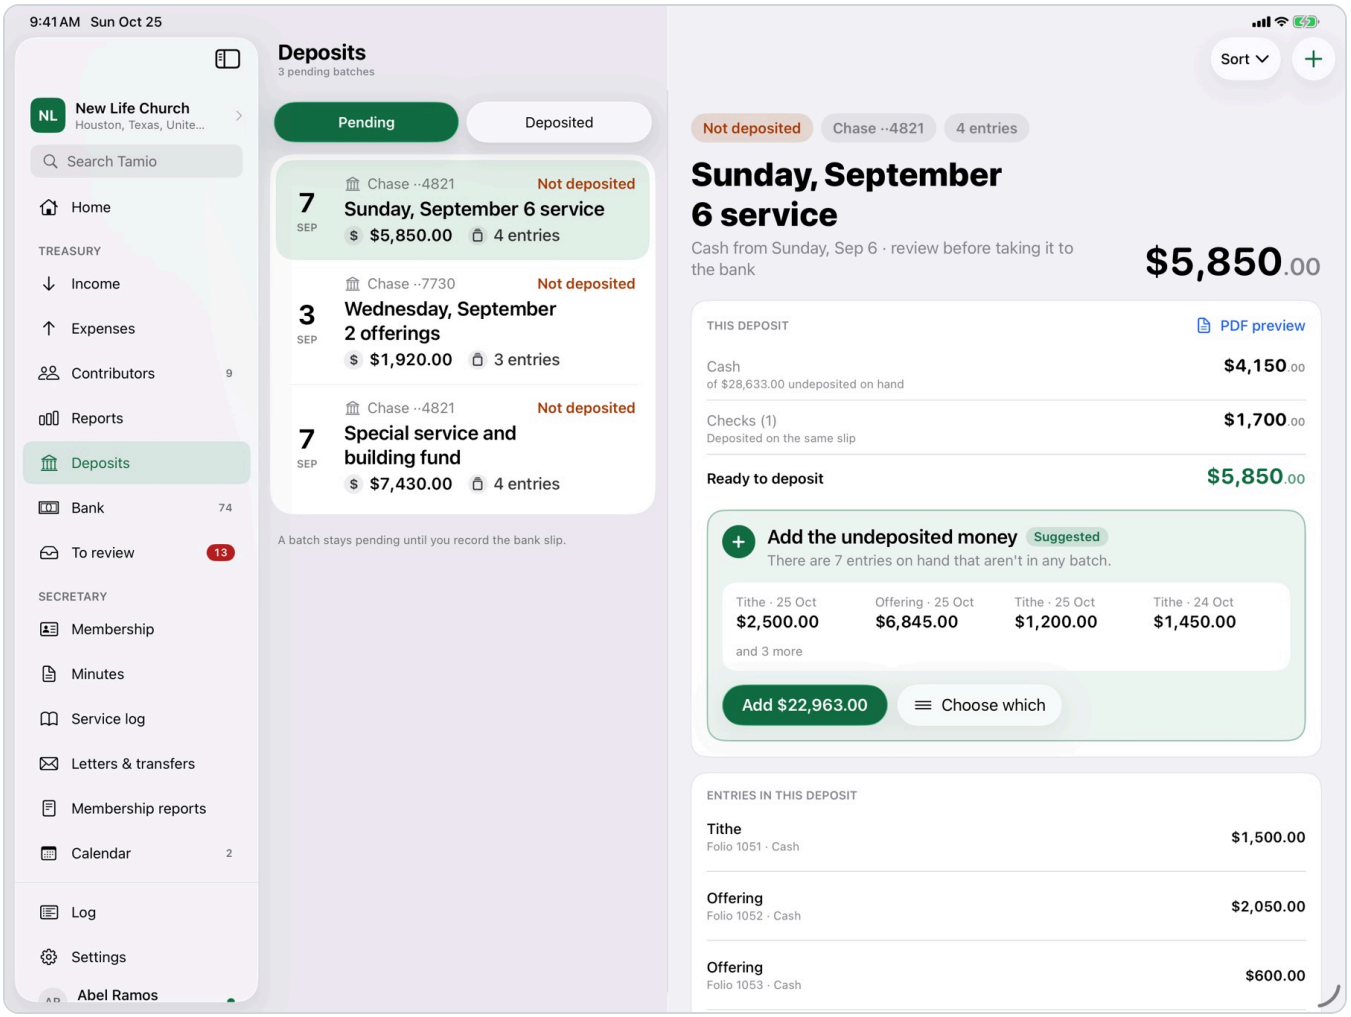

So that the cash box doesn't depend on a single person, someone else can count the money again **without seeing the total**, and Tamio compares the two figures.

1. At the end of the batch, under **SECOND SIGNATURE**, turn on **Have someone else count this money** and tap **Second signature**. A full screen opens that covers everything, so the total can't be seen.
2. Under **WHO SIGNS**, choose the person or type their name. It can't be whoever recorded the batch; if there's only one person in the treasury, the pastor signs.
3. Under **WHAT THEY DID**, choose **I counted the money** or **I checked the record**.
4. Enter **how much you counted** and tap **Check**.
5. If it **matches**, tap **Sign**. If it **doesn't match**, you can **Count again** or **Record the discrepancy**, which is kept in the Log.

The second signature is done on iPhone or iPad.

The second signature hides the total

Deposits on iPad: the list of batches and, next to it, the open batch

Record the deposit at the bank

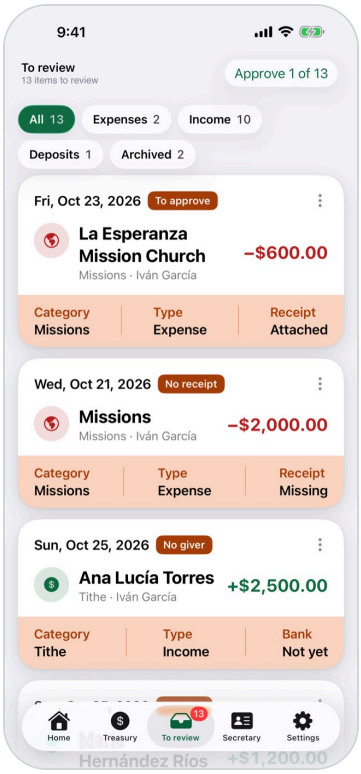

1. Once the money is in the bank, open the batch and tap **Mark deposited**.
2. Check the **Account**, the **Deposit date** and the **Period**. The amount is the batch total and isn't typed in.
3. If you like, enter the **bank reference** (transaction or slip number).
4. Add the **bank receipt**: **Take a photo of the receipt**, **Choose from the library** or **Browse Files**.
5. Tap **Record**. The batch moves to **Deposited** and each transaction shows "Deposited" in its detail.

CHAPTER 7

To review

The inbox of things that need a decision. Nothing is approved by default: what's awaiting approval **doesn't count in the month's totals** until someone approves it.

Where it is: iPhone, the **To review** tab. iPad, **To review**. Mac, `⌘7`.

The To review inbox

What shows up here

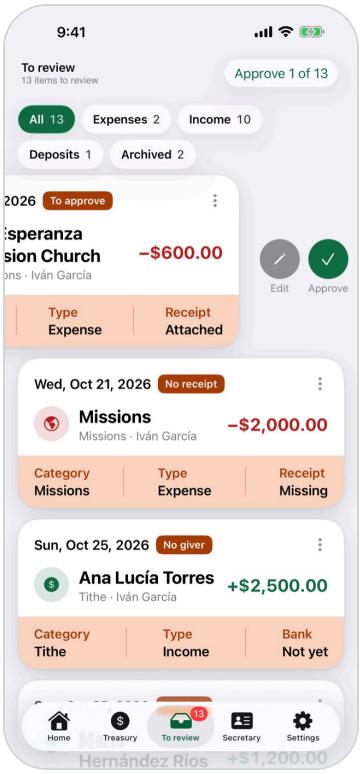

- **Awaiting approval:** a transaction someone needs to approve.
- **Expense without receipt:** an expense of $1,000 or more with no receipt. It can be approved without one.
- **Likely duplicate:** two transactions that look like the same one.
- **Empty category** or **Unlinked giver**: income that isn't tied to anyone on the roster and therefore won't appear on any statement.
- **Second signature missing** on a batch.
- **Archived member:** someone removed from the roster who still appears in transactions.

At the top, filter by **All**, **Expenses**, **Income**, **Deposits** or **Archived**.

How to resolve items

- **Swipe a card to the left** to see its actions: **Approve**, **Edit**, **Return to treasurer**, **Attach receipt**, **Assign category**, **Link giver**, **Go to the batch** or **Restore**, depending on the case.
- The button at the top, **Approve N of M**, approves in one go everything that is only awaiting approval. The other items are decided one by one.
- **Return to treasurer** takes the transaction out of the month's totals until it's corrected.
- Each card's ⋯ button has the same actions.

What you approve goes into the month's totals and the reports. When nothing is left, the inbox says "All caught up".

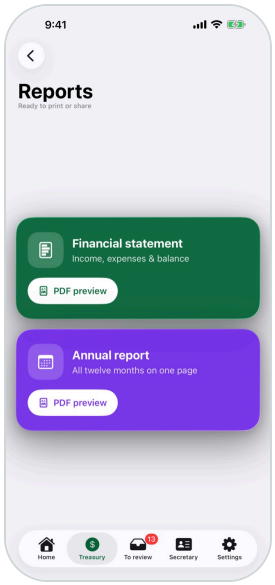

Swiping: Edit and Approve

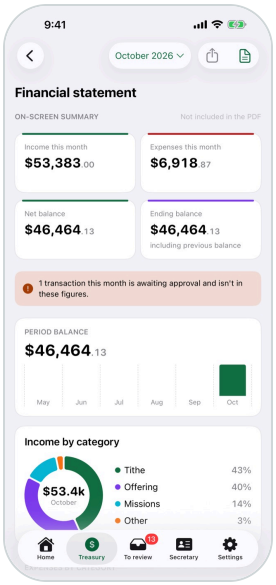

CHAPTER 8

Reports

The reports for the congregational meeting or the board, as letter-size PDFs with the church logo and the treasurer's and pastor's signatures.

The two reports

Financial statement on screen

Where it is: iPhone, **Treasury › Reports** (people with the Secretary role find it in their **Reports** tab). iPad, **Reports**. Mac, ⌘5.

- **Financial statement:** income, expenses, net balance and ending balance for the period, broken down by category, plus the period's deposits (which don't add to the balance: they only move money from the cash box to the bank).
- **Annual report:** all twelve months on one page, with each month's income, expenses and balance.

1. Open the report and choose the **period** (at the top, for example "October 2026"). If you like, filter by a **category**.
2. Check the figures on screen.
3. Tap **PDF preview** and then **Share** to email it, save it to Files or print it.

For the PDF to carry signatures, set them up first in **Settings › Treasurer & pastor** (chapter 16).

> **If a figure doesn't add up**
>
> Reports only count approved transactions. If any are awaiting approval, the report says so at the top ("1 transaction is awaiting approval and isn't in these figures"). Approve them in To review.

CHAPTER 9

Bank

Tamio can read the transactions on the church's account and compare them with the books: what left the bank without being recorded, and what was recorded but never arrived.

> **Only for some churches**
> The Bank feature is available to churches with accounts in the United States (in dollars) and is enabled church by church. If you don't see **Bank** in Treasury, it isn't enabled for yours. The Secretary role doesn't see it either.

Connect the account (administrator)

1. Go to **Settings › Bank** and tap **Connect bank**. Two-step verification must be turned on to connect (chapter 16).
2. Choose your bank and sign in with your credentials in the bank's window. **Your password never goes through Tamio.**
3. Assign each bank account to its account in Tamio. An unassigned account isn't compared.

Tamio only **reads** the account: it doesn't move money, pay or transfer. You can disconnect whenever you like with **Disconnect bank…**.

Compare

In **Treasury › Bank** the bank lines are split into three groups: **Not in Tamio** (in the bank but not in Tamio), **Not in bank** (in Tamio but not in the bank) and **Matched**. Tap a line and Tamio suggests what it is:

- **It's already in Tamio:** find it and tap **Match**.
- **An expense not yet recorded:** **Create expense** records it and matches it in one tap.
- **Not in the books:** for example, a transfer between the church's accounts.

If a match has a difference, you can record it as a **Bank fee** (which creates the expense) or just leave it noted. **Undo match** doesn't delete anything. From the ⋯ menu you get the **reconciliation as a PDF**. Matching is done by the treasurer or the administrator.

CHAPTER 10

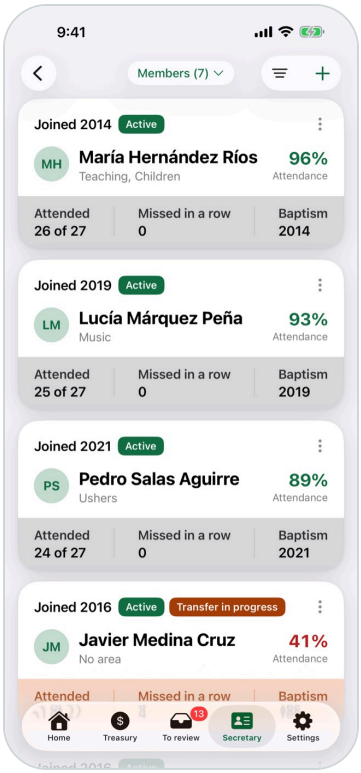

Membership

The church roster: who's a member, since when, their baptism, their ministries, their family and their attendance.

Where it is: iPhone, **Secretary › Membership**. iPad, **Membership**. Mac, ⌘8.

The list

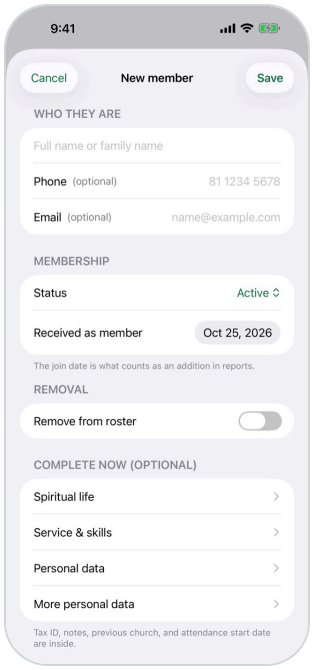

Each card shows the year they joined, their status (**Active**, **Inactive**, **Visitor**, **In process**, or removed: Transferred, Deceased, Withdrawn), their ministries, their **attendance** percentage, consecutive absences and baptism year. With **More filters** you filter by status, ministry, join year or what **needs attention**.

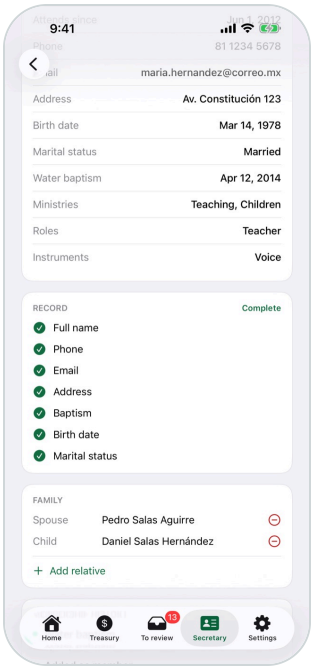

The roster

Add someone

1. Tap **+** (**New**).
2. Under **WHO THEY ARE**, enter the name, phone and email.
3. Under **MEMBERSHIP**, choose the status and the date they were **received as a member**, which is what counts as the join date in reports.
4. If you like, under **COMPLETE NOW (OPTIONAL)** fill in their spiritual life (water baptism, baptism in the Holy Spirit, membership class), their service (ministries, positions, instruments, trades) and personal details.
5. Tap **Save**.

New member

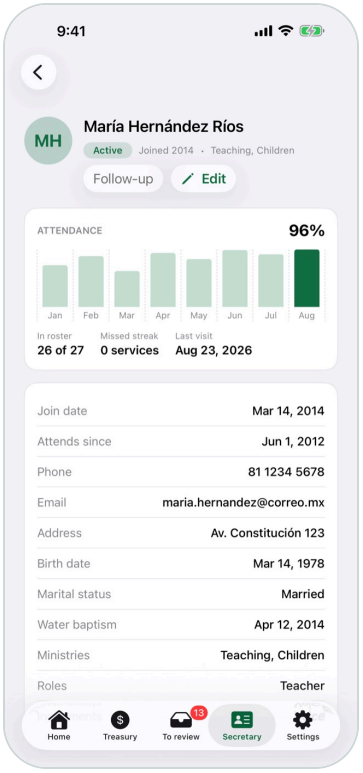

Record and family on the profile

A member's profile

- **Attendance** for the period, with their absence streak and last visit.
- Their details: dates, contact, marital status, baptism, ministries and positions.
- **RECORD:** whether it's complete or what details are missing.
- **FAMILY:** tap **Add relative** and choose the person from the roster and the relationship. If the relative doesn't attend, give them a profile first.

At the top are **Follow-up** and **Edit**.

A member's profile

Pastoral follow-up

In **Follow-up › Add follow-up** you log a call, a visit, a prayer, a message or a pastoral meeting, with its date and whether it's done.

Remove from the roster

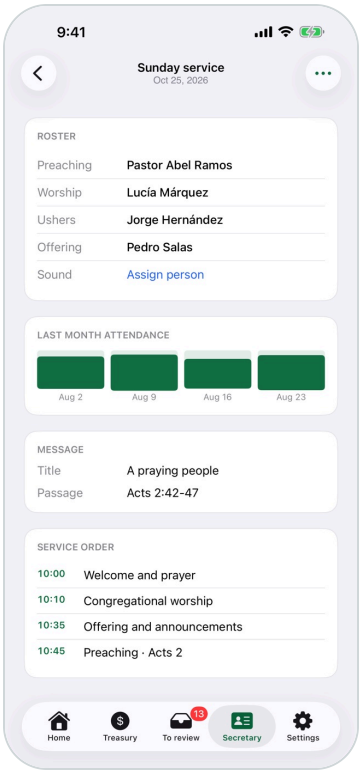

In **Edit**, turn on **Remove from roster** and choose the date and the reason (transfer, death, withdrawal, discipline or other). The person leaves the active roster, but **their history and giving are kept**, and the removal is noted in the Log.

CHAPTER 11

Service log

Each service with its attendance, who led and who preached, the roster for each role and the service sheet.

Where it is: iPhone, **Secretary › Service log**. iPad, the same. Mac, in the sidebar.

Inside a service

Start a service

1. Tap **Actions › New service**.
2. Choose the **date**, the **service type** (Sunday service, morning, evening, prayer meeting, Lord's Supper, special) and the time. Note who **led** and who **preached**.
3. If you like, add the songs, the visitors, the message with its Bible passage, Bible school and special events.
4. Tap **Save service**.

Take attendance

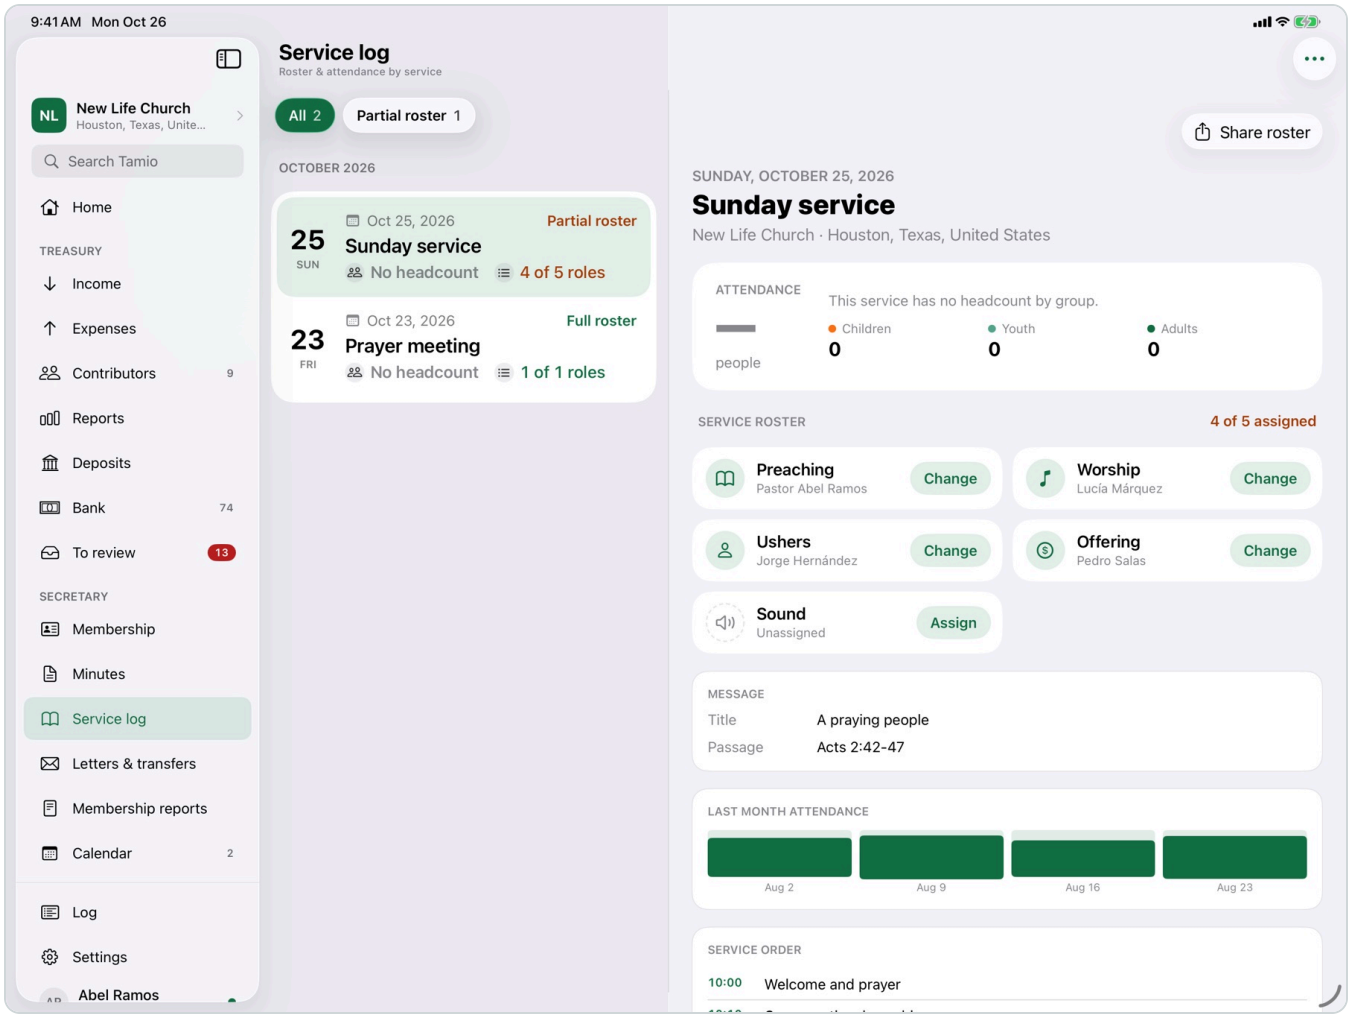

With **Actions › Take attendance** you check off the members present; if someone was absent, you can note why. If attendance isn't taken by name, use the **count by group** (children, youth, adults). Attendance feeds each profile's percentage and the reports.

The service roster

Each role (Preaching, Worship, Ushers, Offering, Sound, Children, Prayer) has its own **Assign** or **Change**. The service list marks each one as **Full roster**, **Partial roster** or **No roster**. With **Share roster** you send it to the team as a message.

Service sheet

Actions › Service sheet (PDF) builds the order of service, the roles and the visitors, with space for the reviewer's signature.

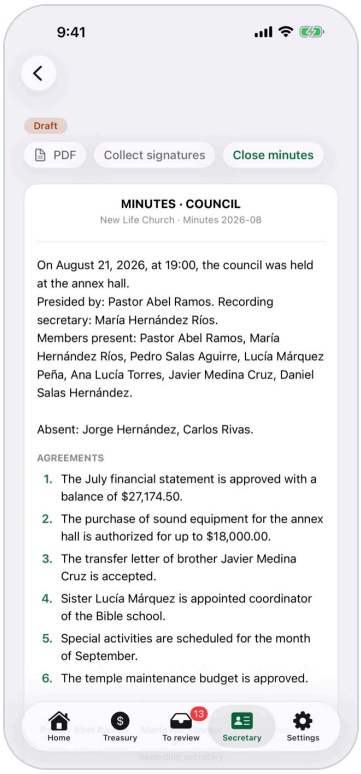

Service log on iPad, with the roster by role and “Share roster”

CHAPTER 12

Minutes

Minutes of board, congregational and administrative meetings: from draft to signed and closed, with their PDF.

Where it is: iPhone, **Secretary › Minutes**. iPad, **Minutes**. Mac, ⌘9.

Minutes in draft

Write the minutes

1. Tap **+** (**New minutes entry**).
2. Under **BASIC INFORMATION**, choose the meeting type, title, date, place, start and end time, **who presided** and the **recording secretary**, and mark whether there was a quorum.
3. Under **ATTENDANCE**, check off the members present and absent and add the guests.
4. Write the **agenda items** and the summary, and add the **motions** and **resolutions** one by one.
5. Tap **Save minutes**. They stay as a **Draft** and can still be completed.

Sign and close

1. When the minutes are complete, tap **Collect signatures**. Tamio asks for the signatures of who presided, the recording secretary and the witness.
2. Tap each name as the signature is received on paper, then **Confirm signatures**. The minutes become **Signed**.
3. Tap **Close minutes**. Closed minutes **can no longer be edited**, and the closing is noted in the Log.

The **PDF** button produces the minutes on the church letterhead.

CHAPTER 13

Letters & transfers

Letters of recommendation, membership certificates, transfers, appointments and more, with their own numbering and the church letterhead.

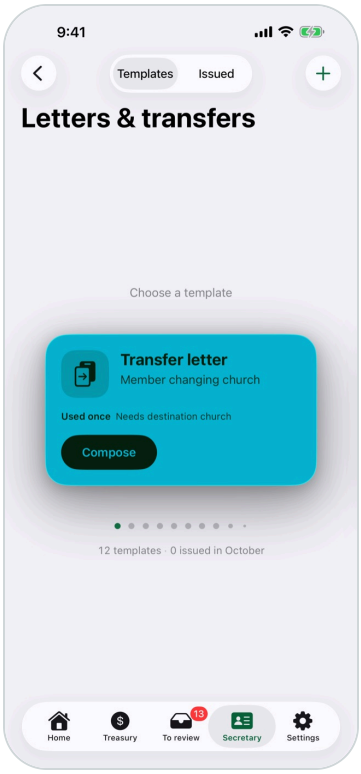

Where it is: iPhone, **Secretary › Letters & transfers**. iPad, the same. Mac, in the sidebar.

At the top choose **Templates** or **Issued**. There are templates for transfer letters, recommendation, good standing, introduction, invitation and thanks, membership certification and certificate, ministerial appointment, certificate of service, pastoral salary certificate and others. Each template says what it needs (“Needs destination church”, “Needs a recipient”…).

Issue a letter

1. Choose the template and tap **Compose**.
2. Fill in the **letter’s fields**; Tamio counts how many you’ve done.
3. Check the **Preview**.
4. Tap **Sign & send** and confirm with **Sign & issue**. The letter gets its number, moves to **Issued** and is noted in the Log.

If fields are missing, Tamio won’t let you issue it and tells you how many. On iPad, each letter also has the treasurer’s and pastor’s **Sign** buttons, which use the signature saved in Settings. On the Mac, a draft with gaps has **Fill in details…**.

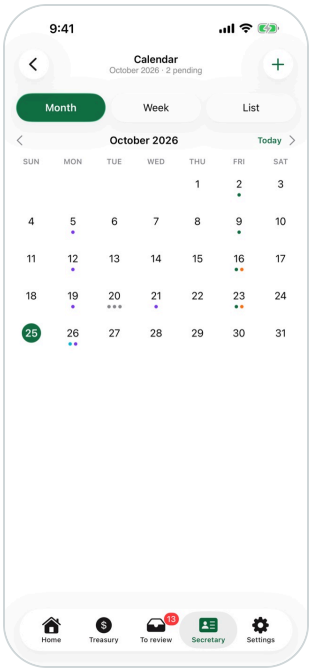

Letter templates

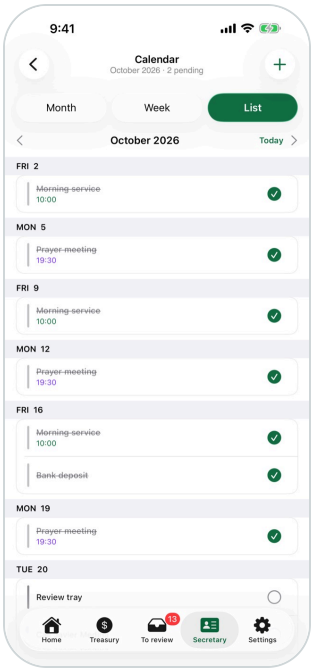

CHAPTER 14

Calendar and membership reports

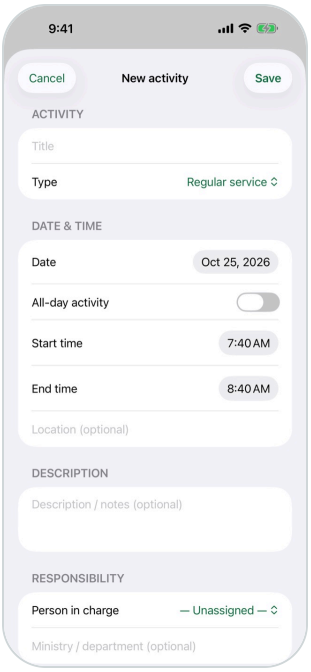

Calendar

Month view

List, with the “done” circle

New event

Where it is: iPhone, **Secretary › Calendar**. iPad, **Calendar**. Mac, in the sidebar.

- At the top choose the **Month**, **Week** or **List** view, and move with the arrows or **Today**.
- **New event:** tap **+**, enter the title and type, the date, the time (or **All day**), the place, the person in charge and the ministry. You can mark it as an **important date** and set a **reminder** (same day, one or two days before, or one week before).
- **Mark as done:** tap the circle at the end of the event. If you made a mistake, tap it again to unmark it.
- Repeating events (for example, the prayer meeting every Monday) appear on each date marked “Repeats”. When you tap one, you choose whether the change is for **This date only** or for **The whole series**. New repeating series can’t be created from the app.

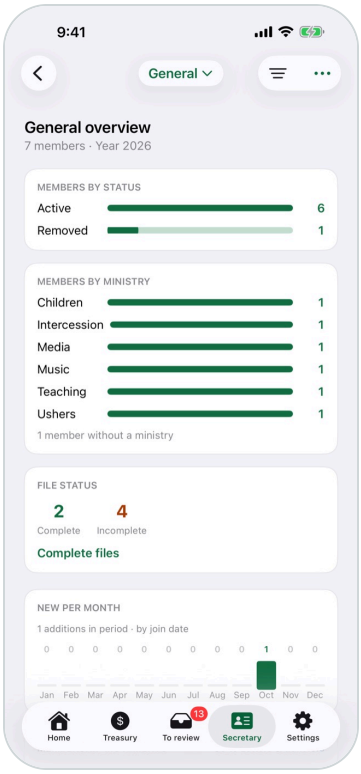

Membership reports

Where it is: iPhone, **Secretary › Membership reports**. iPad, the same. Mac, in the sidebar.

At the top choose the report and the period (month, quarter, year, range or all time):

- **General:** members by status and by ministry, complete and incomplete records, new members per month and membership changes (arrivals and departures by transfer).
- **Members:** the list filtered by active, new, transferred, frequent absences, incomplete record…
- **Attendance:** services, total attendance, average per service and who came most.
- **Follow-up:** who needs pastoral attention: consecutive absences, not seen in a while, newcomers to walk alongside.

With the ⋯ button you export the report as text or CSV, or print it.

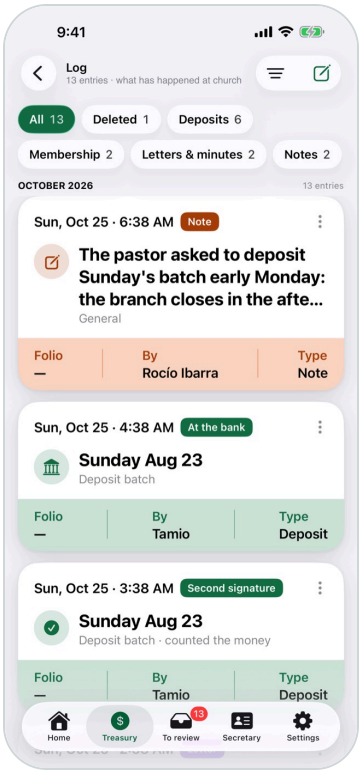

General roster report

CHAPTER 15

The Log

The church's logbook of what has happened. Entries here can't be edited or deleted: that's what makes it a record.

Where it is: iPhone, the **Log** shortcut in Treasury or Secretary. iPad, **Log** at the bottom of the sidebar. Mac, `⌘0`.

The Log

What it keeps

- **Deleted transactions**, with their amount and number.
- **Batches**: when they left the cash box, the second signature, whether it **didn't match** and when they reached the bank.
- Roster **status changes** and **removals**, with the reason.
- **Issued letters** and **closed minutes**.
- **Notes** written by the team.

Each entry says when it happened, what it was and who did it, and keeps a **copy** of what was there at that moment. At the top, filter by **Deleted**, **Deposits**, **Membership**, **Letters & minutes** or **Notes**.

Write a note

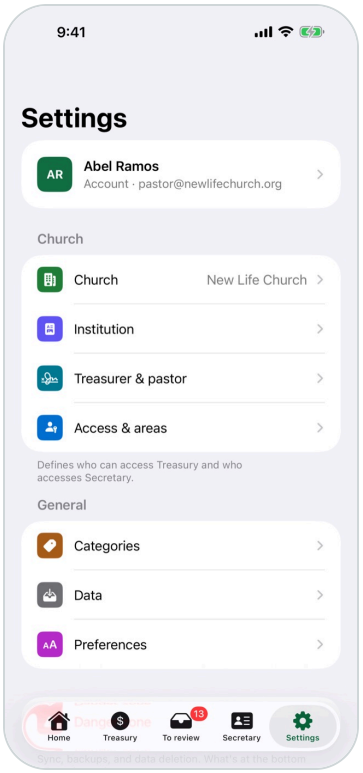

Tap the pencil button (**Write a note**), choose **who sees it** (Everyone, Treasury or Secretary) and write what happened. For example: "The pastor asked that Sunday's batch be deposited early Monday."

The treasurer sees Treasury entries and notes; the secretary, Secretary entries and notes; the administrator, everything.

CHAPTER 16

Settings

Where it is: iPhone, the **Settings** tab. iPad, **Settings**. Mac, ⌘ ,.

Settings on iPhone

Your account

At the top, your name. There you see your email and role, and under **Security** you turn on **Require Face ID to open** and **Two-step verification**, which also asks for a code from your authenticator app when you sign in (recommended for whoever manages the bank). At the bottom are **Sign out**, which signs out on that device only, and **Delete my account**.

Church

- **Church**: the **logo** (it appears on the letterhead of letters, minutes and reports), the name, city and country, tax ID, **currency** and opening balance.
- **Institution**: address, phone, email and the letterhead footer. Tap **See how the letterhead looks**.
- **Treasurer & pastor**: their names and titles, and their **signatures** (see below).
- **Access & areas**: the church's plan, people, invitations and permissions.

Signatures on PDFs

In **Treasurer & pastor › Signature** draw the signature with your finger or Apple Pencil (on the Mac, with the trackpad), or upload an image. The signature **stays on the device where it was drawn**: it doesn't sync, so do it on every device you'll produce signed documents from. With **Print signatures on PDFs** turned off, the signature block isn't printed.

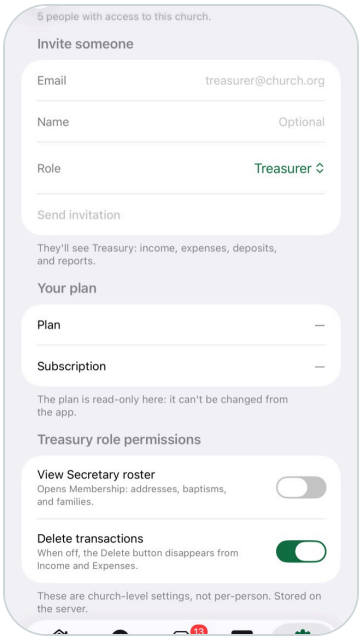

Invite the team (administrator)

1. Go to **Settings › Access & areas**, to the **Invite someone** section.
2. Enter the person's **email**, their name (optional) and choose the **role**: Treasurer, Secretary or Administrator. Tamio explains what each one will see.
3. Tap **Send invitation**. They'll get an email to set their password. If they already had a Tamio account, they join your church directly.

An email can only belong to one church. To change someone's role, invite them again with the new role.

Treasurer role permissions

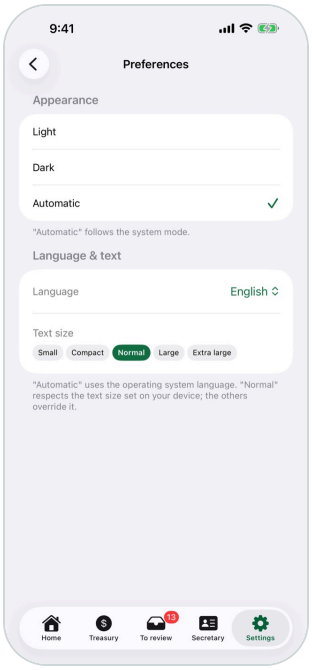

On the same screen the administrator decides whether the treasurer can **see the Secretary roster** (it opens Membership: addresses, baptisms and families) and whether they can **delete transactions**. These belong to the church, not the person: they apply to whoever holds the position.

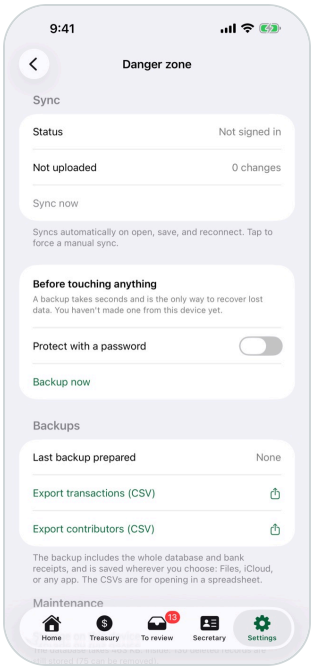

Invitations, plan and permissions

General

- **Categories**: create, rename or delete your own income and expense categories. The ones that come with Tamio can't be deleted.
- **Bank**: connect and assign accounts (chapter 9), if your church has it.
- **Data**: import people, gifts, income and expenses from CSV (chapters 4 and 5).
- **Preferences**: **Appearance** (light, dark or automatic), **Language** (Español, English or automatic, without signing in again) and **Text size** (Small, Compact, Normal, Large, Extra large). "Normal" follows the phone's text size.

Preferences

Danger zone: sync and backups

Danger zone (administrator)

- **Sync:** when it last synced and how many changes are waiting to upload, with **Sync now**. On iPad and Mac it's a section of its own.
- **Backups:** **Backup now** saves a copy of everything, which you can protect with a password (write it down: without it the backup can't be opened, not even by you). You can also export transactions or contributors to CSV.
- **Restore a backup**, **Delete all records** and **Factory reset** can't be undone: make a backup first.

The church's plan

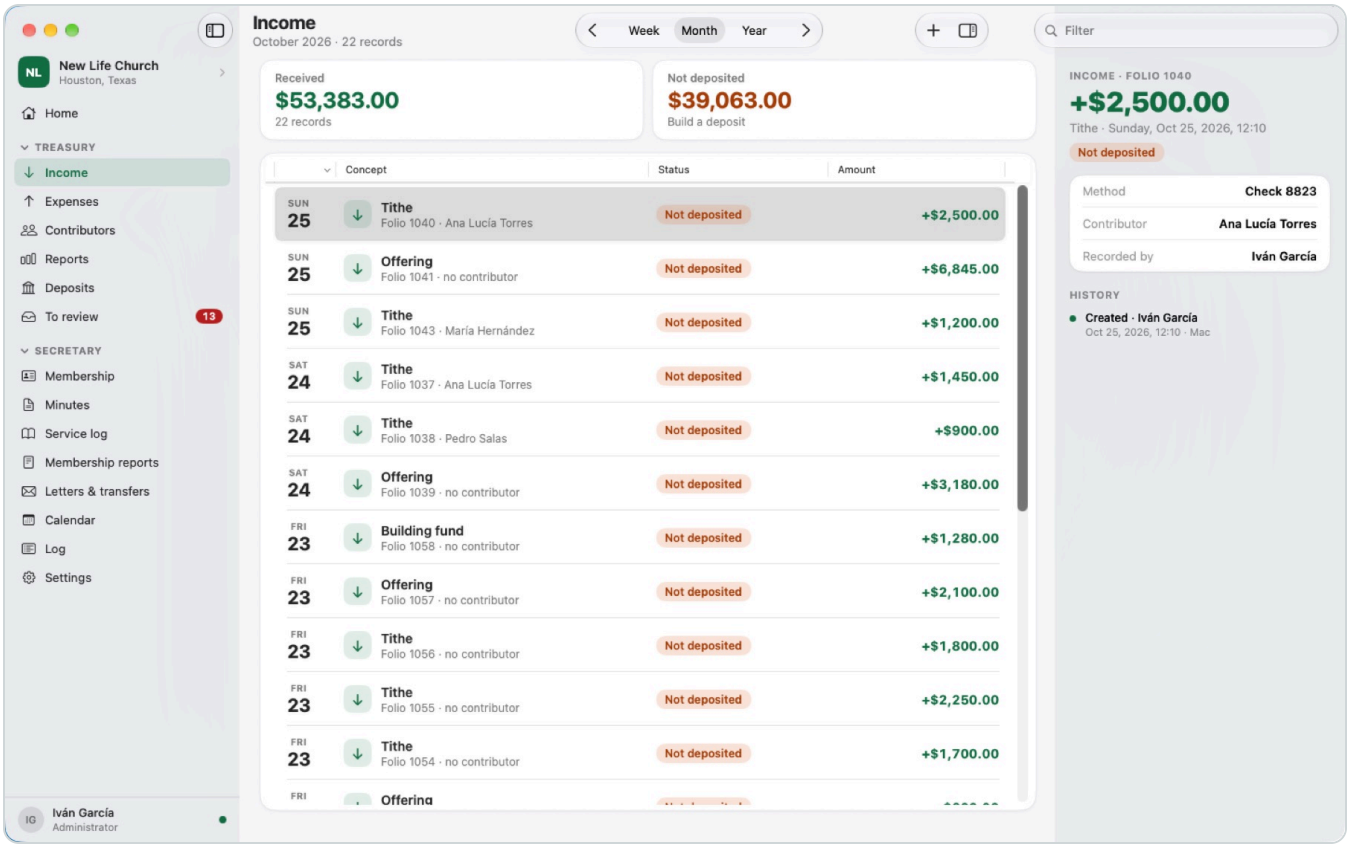

In **Access & areas › Your plan** you see the plan (Complete, Treasury only or Secretariat only) and the subscription status. The plan is read-only here: it can't be changed from the app.

If the plan expires, Tamio keeps working normally for **10 more days**, with an orange banner showing how many days are left. After that it becomes **read-only** (red banner): you can see and export everything, but nothing new is saved until you renew. Your data is safe.

CHAPTER 17

Tamio on the Mac

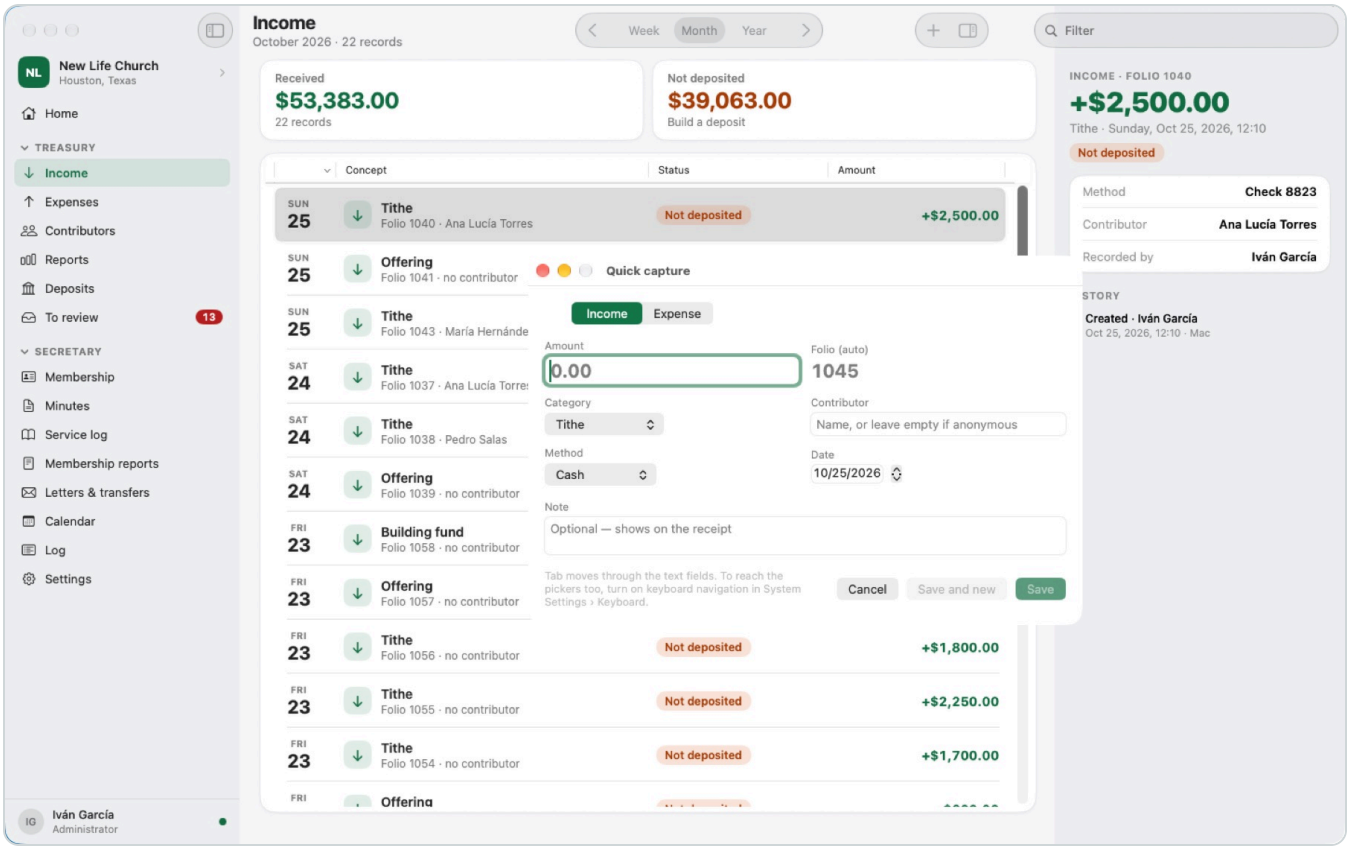

The Mac is comfortable for desk work: entering many transactions in a row, reviewing, producing reports and running the secretary's office from the keyboard.

Income on the Mac, with the inspector on the right

Mac-only features

- **Inspector** (⌘ I): on the right, the detail of the row you select.
- **Quick capture** (⌥ ⌘ N from Home or Treasury): a small window to record income or an expense without leaving what you're looking at. ⌘ S saves, ⇧ ⌘ S saves and opens another, Esc closes.
- **Period in the toolbar:** Week, Month or Year, with arrows to go to the previous or next period.
- **Approve all safe** in To review: approves what is only awaiting approval.
- Right-click a transaction: **Approve**, **Duplicate**, copy the number, description or amount, and **Delete…**.

Quick capture (⌥⌘N)

> **What's done on iPhone or iPad**
>
> On the Mac you can view deposits, but **building a batch, the second signature and recording the deposit with the receipt photo** are done on iPhone or iPad. A person's annual statement and giving report aren't produced from the Mac either.

Keyboard shortcuts

Shortcut	What it does
⌘1 … ⌘0	Go to: 1 Home · 2 Income · 3 Expenses · 4 Contributors · 5 Reports · 6 Deposits · 7 To review · 8 Membership · 9 Minutes · 0 Log
⌥⌘N	New item for the section you're in: transaction (quick capture), member, minutes, event, letter, service or note
⇧⌘M · ⇧⌘T	New minutes · New letter
⇧⌘I	Import people
⌘I	Show or hide the inspector
⌘K or ⌘F	Jump to the filter to search
⌘R · ⌘D	Approve · Duplicate the selected transaction
⌘S · ⇧⌘S · Esc	In sheets: save · save and add another · close
⇧⌘L	Switch between light and dark
⌘,	Settings

In the **Help › Welcome to Tamio** menu you can watch the Mac introduction again.

CHAPTER 18

FAQ and help

I recorded something on my iPhone and don’t see it on the Mac.

Make sure both have internet. On iPhone, a card marked “Not uploaded” hasn’t reached the server yet. On iPad and Mac, the dot next to your name is green when everything is synced. The administrator can force it with **Sync now**.

The report doesn’t match what I entered.

Reports only count what’s approved. Check the **To review** inbox: anything awaiting approval isn’t in the figures.

I don’t see Treasury (or Secretary).

It depends on your role. Ask your church’s administrator to change your role in **Settings › Access & areas**.

I want to invite someone and it says that email already belongs to another church.

An email can only be in one church. That person has to leave the other church first, or use a different email.

The signatures don’t appear on the PDF.

Signatures live on the device where they were drawn. Draw them on that device in **Settings › Treasurer & pastor** and make sure **Print signatures on PDFs** is turned on.

I deleted a transaction by mistake.

Deleting can’t be undone, but the **Log** keeps a copy with the amount, the number and who deleted it: with that information you can enter it again.

Does Tamio move money or charge anything from the app?

No. Tamio records what has already happened. Even with the bank connected it doesn’t move money: it only reads the account. And it doesn’t sell or share the congregation’s data with anyone.

Where can I get help?

At **tamio.church/soporte.html** you’ll find how to contact us. The privacy policy is at **tamio.church/privacidad.html**.
